To Whom It May Concern,

NorthWest Healthcare Properties REIT provides real estate solutions tailored to the healthcare industry on a global scale. We understand that healthcare tenants have specialized real estate needs. In Canada, the REIT is the largest non-government owner and manager of medical office buildings and healthcare facilities with 74 properties located from coast to coast.

We have been fortunate to work hand in hand with PL Consulting Corp by utilizing their assistance to identify areas to implement energy reduction strategies, and energy saving projects.

PL has performed Energy Audits on 35 of our properties, and has continuously provided in-depth knowledge and expertise for engineering green solutions.

PL has also been of great assistance implementing projects, specifically multiple Building Automation Systems, which are effective at maintaining constant temperatures in the facility, and allow easy remote access to make any changes to our heating and cooling systems.

Overall, I would highly recommend PL for their Engineering services. They have continued to offer competitive, timely, and consistent support for each and every project they have been involved in.

Titus Ciortea
Operations Manager

NORTHWEST HEALTHCARE PROPERTIES CORPORATION
as Agent and Manager for **Healthcare Properties Holdings Ltd.**
