CASE STUDY: AKELIUS

798 RICHMOND ST. TORONTO

BUILDING AUTOMATION SYSTEM

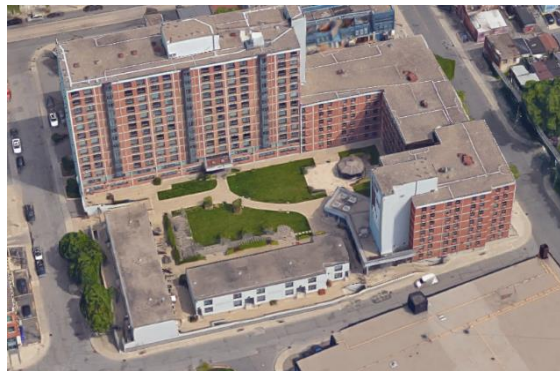

Challenge: Control rising utility costs and eliminate heating and cooling issues throughout this residential building.

Cure: PL Consulting designed and provided the turnkey installation of a Building Automation System.

BENEFITS

- **Accurate, real-time information**
- **Reduced contractor calls**
- **Cut utility costs**

Automation keeps building climate within a specified range, monitors performance and device failures, and provides email malfunction alarms to building maintenance staff and PL Consulting.

TAKE ADVANTAGE OF GOVERNMENT INCENTIVES

Incentives are available for equipment such as lighting, mechanical upgrades and for installing new control systems to improve the overall efficiency of your building.
