To whom it may concern,

Optik K&R retained PL Energy Services due to rising energy expenses at our eye care manufacturing facility. PL Energy Services met with our management team and recommended an ASHRAE Level II Energy Audit. I was concerned the application process for a rebate would be time consuming and frustrating. However, PL conveniently arranged for a rebate of 50% of the cost of the Energy Audit without any effort on my part.

PL's Energy Audit showed a detailed, comprehensive breakdown of the equipment at our facility, itemizing energy consumption, areas for improvement, rebates and payback. Based on their guidance, we have prioritized and completed the first project (lighting) and are now looking at subsequent projects.

We are pleased with the expertise, professionalism and straightforward answers provided by PL Energy Services and would recommend PL Energy Services to anyone looking to reduce energy consumption and maintenance costs.

Yours truly,

Ryan Maxwell
President
