To Whom it may concern,

ISPA Store Fixtures engaged PL Energy Services to provide an Energy Audit in June 2018. Their Professional Engineering Firm provided us direction with how to control our energy consumption.

After the Energy Audit was completed and the various energy saving projects reviewed, we utilized PL Energy to implement a quick payback project. The energy project reduced our hydro cost by \$24,000/year.

I am very pleased with the service and expertise from PL Energy. We strongly encourage anyone, wanting to control and reduce their energy consumption, to engage with PL Energy.

Sincerely,

A handwritten signature in black ink, appearing to read "Stu Wilson", with a long horizontal line extending to the right.
